EDUCATION

KIET Group of Institutions
B.Tech in Computer Science

Ghaziabad, Uttar Pradesh
2023 – Present

PROJECTS

VulnTest – Web Vulnerability Scanner 📄 | *Node.js, REST APIs, Security Testing* Feb 2026 – Present

- Engineered a web vulnerability scanner detecting XSS, SQL Injection, and Path Traversal across live web targets.
- Curated a payload library of 1500+ fuzzing and injection strings for automated testing across multiple endpoint types.
- Built a Node.js/Express backend that automates end-to-end security scans with concurrent request handling.
- Reduced false positives through pattern-based validation and HTTP response filtering.
- Optimized performance using concurrent request handling to reduce scan time and improve efficiency.

Full-Stack E-Commerce Application 📄 | *Node.js, React, Microservices, Docker* Dec 2025 – Feb 2026

- Decomposed a monolithic design into 4 independent microservices (auth, catalog, orders, payments), reducing inter-service coupling and enabling independent deployment.
- Delivered 15+ RESTful API endpoints using Node.js/Express, covering full CRUD operations across all services.
- Containerized all 4 services with Docker, cutting environment setup time from hours to under 5 minutes.
- Crafted a React frontend handling cart, checkout, and product browsing flows.
- Enforced data consistency across distributed services using event-driven patterns, eliminating orphaned order records.
- Implemented inter-service communication and ensured data consistency across distributed services.

Edemy – Online Learning Platform 📄 | *React, Tailwind CSS, Node.js, Clerk* Oct 2025 – Dec 2025

- Built a full-stack LMS with course browsing, enrollment, and progress tracking..
- Integrated Clerk for authentication and user session management.
- Built a mobile-responsive UI using React and Tailwind CSS.
- Shipped 12 backend API endpoints with Node.js to manage course content, user records, and progress state.
- Designed Node.js backend APIs to manage courses, users, and progress state.
- Implemented lazy loading and optimized component re-renders to improve frontend load speed.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, TypeScript, JavaScript, HTML/CSS

Frameworks: React, Node.js, Express, FastAPI

Developer Tools: Redis, Prisma, Zod, Git, Docker, Google Cloud Platform, VS Code

Coursework: OOP, Computer Networks, DBMS, Operating Systems

CERTIFICATIONS

Cisco Certified Network Associate – Cisco Apr 2026

AWS Certified Cloud Practitioner – Amazon Web Services Dec 2025

Database Programming with SQL – Oracle Academy Nov 2024

Python Programming – Udemy Aug 2023

ACHIEVEMENTS

- Built a vulnerability scanner detecting 3+ critical OWASP vulnerabilities with 90%+ detection accuracy.
- Solved 400+ DSA problems across LeetCode, Codeforces, and GFG; ranked in top 20% on LeetCode.
- Completed 50+ hands-on labs on PortSwigger Web Security Academy covering SQLi, XSS, SSRF, and CSRF.
