EDUCATION

KIET Group of Institutions

B.Tech in Computer Science

Ghaziabad, Uttar Pradesh

2023 – Present

PROJECTS

PrepAI – Smart Interview Prep Platform 📄 | *Node.js, Puppeteer, Gemini API*

May 2026 – June 2026

- Engineered a full-stack AI interview preparation platform using React, Node.js, Express, and MongoDB, enabling users to generate customized interview practice guides and study roadmaps.
- Integrated Google Gemini API with Zod schema validation to perform real-time, structured analysis matching candidate resumes against target job descriptions.
- Developed a server-side PDF generation pipeline utilizing Puppeteer to compile and download ATS-compliant resumes from AI-structured JSON templates.
- Implemented secure authentication using JWT, token blacklisting, and cross-origin HTTP-only cookies for seamless session management.
- Containerized the backend application using Docker to handle Chromium system dependencies, ensuring automated, crash-free deployment pipelines on Render.

Full-Stack E-Commerce Application 📄 | *Node.js, React, Microservices, Docker*

Dec 2025 – Feb 2026

- Decomposed a monolithic design into 4 independent microservices (auth, catalog, orders, payments), enabling independent deployment.
- Delivered 15+ RESTful API endpoints using Node.js/Express, covering full CRUD operations across all services.
- Containerized all 4 services with Docker, cutting environment setup time from hours to under 5 minutes.
- Crafted a React frontend handling cart, checkout, and product browsing flows with event-driven data consistency.
- Integrated Clerk for authentication and role-based access control across microservices, securing inter-service API communication.

Edemy – Online Learning Platform 📄 | *React, Tailwind CSS, Node.js, Clerk*

Oct 2025 – Dec 2025

- Built a full-stack LMS supporting course browsing, enrollment, and progress tracking.
- Integrated Clerk for authentication and managed user sessions using JWT.
- Developed 12 REST API endpoints with Node.js handling course content, user records, and progress state.
- Designed a mobile-responsive UI with React and Tailwind CSS, using lazy loading to reduce initial load time.
- Modeled and managed application data using MongoDB, storing user enrollments, course metadata, and progress records.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, TypeScript, JavaScript, HTML/CSS

Frameworks: React, Node.js, Express, FastAPI

Developer Tools: Redis, Prisma, PostgreSQL, Zod, Git, Docker, Google Cloud Platform, VS Code

Coursework: OOP, Computer Networks, DBMS, Operating Systems

CERTIFICATIONS

Cisco Certified Network Associate – Cisco

Apr 2026

AWS Certified Cloud Practitioner – Amazon Web Services

Dec 2025

Database Programming with SQL – Oracle Academy

Nov 2024

ACHIEVEMENTS

- Solved 500+ DSA problems across LeetCode, Codeforces, and GFG.
- Completed 50+ hands-on labs on PortSwigger Web Security Academy covering SQLi, XSS, SSRF, and CSRF.
